

# UPS Temperature True® Packaging Services

## Specifications

Refrigerated

2 days (summer)  
1-2 days (winter)

Qualified for the  
UPS domestic network

## Med 300

**UPS Temperature True® Packaging** provides pre-qualified packaging systems for your temperature-sensitive products at a competitive cost. We offer packaging options to protect products with a range of time and temperature requirements. Each solution has been tested and qualified to maintain appropriate temperature levels throughout the UPS domestic network, giving you peace of mind that your products will reach their destination with the quality intended.

The Med 300 is a simple refrigerated shipping system that uses evaporative cooling provided by an easy-to-activate self-contained cooler.

- Coolers are built into container lids with no gel packs
- Five sizes available
- Systems are portable and can be stored at room temperature
- Lightweight and simple to assemble
- Replacement cooling engines available

## Ideal for

Pharmaceuticals  
Clinical treatments  
Diagnostic samples  
Specialty pharmacy
